### Section III. Guidelines

A. Central Savannah River Resource Conservation and Development Council, Inc. through a Georgia Natural Resources Conservation Service – Conservation Incentive Grant (CIG) will:

1. **Reimburse the participant up to \$3,000.** All rebates are tentative pending receipt of final invoice from contractor. No more than 50% of the actual cost of the job up to \$3,000 will be paid.
2. Provide overall project administration, including payment of rebates.
3. Visually inspect the injection system.
4. Withhold \$500 from the rebate until documentation of project benefits has been received from the participant.

B. Participant will:

1. Obtain necessary contractors needed to establish a fertigation/chemigation injector system to be used in conjunction with existing center pivot irrigation systems.
2. Utilize and maintain the injection equipment for its intended purpose for 5 years.
3. Provide a paid receipt to Central Savannah River RC&D Council.
4. Allow periodic visits, access and inspection of the equipment for monitoring and educational purposes.
5. Record and submit project benefits as requested by Central Savannah River RC&D Council.
