

On June 11th, the Upper Chattahoochee River Soil & Water Conservation District partnered with the Chestatee Chattahoochee RC&D Council and White County Extension to hold a workshop at Satterfield Farms in White County. Participants got an update on AgrAbility - A UGA funded program that helps disabled and aging farmers to still manage their land with new technologies. We also learned about how drones can be used on the farm. Lastly folks got an Extension update of local and state programs being offered in the area.
