**Register by October 27th**

Invasive species are one of the greatest threats to the environment worldwide and in Georgia, and they produce billions of dollars in damages annually. The First Detectors program offers an advanced workshop to provide tools, educational materials, and training for stakeholders including: Master Gardeners, Master Naturalists, Citizen Scientists, professionals, and landowners. We will focus on invasive plants that are found in the Georgia Piedmont region including: Chinese Privet, Japanese Stiltgrass, Autumn Olive, Japanese Knotweed, English Ivy and

Download the Free Smartphone App, EDDMapS Pro, to your phone, tablet or iPad prior to attending the workshop.
